CANADIAN MULTICULTURALISM DAY

June 27 is celebrated The Canadian Multiculturalism Day, which is an opportunity to learn more about multiculturalism around the country.

Canada is one of the most multicultural countries in the world due to different factors like the opportunities offered to international students who migrate and have the chance to work while they are studying.

The country encourages international talents to look for and get a job offer to move to Canada.

Canada is also looking to increase its population number and bring in 1.5m immigrants by 2025.

According to the BBC in 2018, Canada was considered the most multicultural country in the world and it still is.
